Game Screen

The Blood Suckers game screen is composed of three main areas - video display, keypad and game panel.

The **Video Display** or main game reel and Free spin reels are visible in the upper area and make up the majority of the screen. The PAYTABLE button and information for the maximum possible coin win are shown in this area.

The **Keypad** shows the current bet level (or the number of coins that the player bets per bet line). In addition, it also contains the current number of bet lines, the player's available coins and the recent coin value.

The **Game Panel**, situated at the very bottom of the screen houses the buttons for game settings such as audio, auto play menus and game rules. It also houses account information and switches between showing the play mode (whether Play or Fun modes), available cash, bet and amount won.

Game Results

Players have the opportunity to win on any of the bet lines on which they bet. Once the reels stop, the game highlights which lines are winners and how much the player wins on each line. The player's total winnings are summed together and shown in the WIN box. The amount won is displayed in the game panel and added to the cash.

Vampire Slaying Bonus Game

3 or more bonus symbols in succession from leftmost to right, on an active bet line start the Vampire Slaying Bonus Game.

Players will find themselves inside a vampire den surrounded by coffins. Players must click on a coffin to open it and slay the vampire inside. Players win corresponding coins for every vampire slain. The bonus game ends when bats fly out of the selected coffin.

Note: Only one bonus game awarded per spin.
