

Devil's Delight Game Information

Devil's Delight is a cheeky and devilish 5-reel, 20-line video slot from Net Entertainment™. The game features a Soul Reaper bonus game, wild substitutions and extra free spins with winnings reaching €100,000.

Free Spins – 3 or more scatter symbols triggers the Free Spin feature. Players click on one of the pentagram symbols to reveal the number of free spins and Free spin win multiplier. During a Free Spin round, when a player gets 2 or more Free Spins, this activates the additional Free spins or multipliers feature. Additional free spins and multipliers are added to the current free spins and multiplier (max x5).

Wild substitution – The Devil Wild symbol substitutes for any other symbol to complete a winning bet line, except scatters and bonus wins.

Wild, Bonus and Scatter symbols

Soul Reaper Bonus Game – 3 bonus symbols on a bet line start the bonus game. The game is comprised of different characters and 5 symbols representing a sin for each one. The player must match the sins to the characters. A correct match wins coins, and the character's soul is added to the SOUL-O-METER. The game ends when the player has tried matching all sins with the characters.

Sin Spins – A special free spin mode is activated when the SOUL-O-METER is full. The player needs to collect 15 souls to fill the meter. The player then wins 10 free spins. The reels use images depicting the 7 deadly sins.

Devil's Delight Game Design

The Devil's Delight slot is comprised of three main elements—video display area, keypad and game panel.

Devil's Delight game screen

Video display area - The main game, free spins and bonus games are played in this area. In addition, the payable is also displayed in this area.

Keypad - The keypad houses the current bet level (number of coins per bet line), the current number of bet lines, available cash in coins and the current coin value. In addition, the main game buttons used to select the bet level, bet lines, coin value, view the bonus game preview and start the game are located in this area.

Game panel - In this area the game displays the available cash in the player's account, as well as the amount bet and won. Buttons for the game settings menu, audio, game rules and autoplay are located to the left on the game panel history.

Game Actions

Players can select the coin value, number of bet lines and bet level before spinning the reels. The minimum bet is one coin on one bet line, and the maximum bet is 200 coins covering all 20 bet lines at 10 coins per line.

The buttons on the key pad perform the different game actions:

BET LINES	When the button is clicked the bet line counter increases by one and an additional bet line is highlighted. Players can also click a betline number to select the corresponding betlines.
BET LEVEL	This increased the bet level by one.
COIN VALUE	This increases the coin value.
MAX BET	When this button is selected, the bet level counter changes to 4, all bet lines are active and the game round starts.
	Starts a game round.

Game rounds - A Devil's Delight game round starts when the player clicks the spin button; the amount bet is deducted from the current credit (available coins and credit). The reels spin and automatically come to rest. The player has an option to stop the reels by clicking the spin button (available when G4 mode is disabled).

Game results - Players can win on any one of the bet lines on which they bet. The game highlights which lines are winners and how much has been won on each line. The total winnings are added together and shown in the Win box. The amount won is added to the cash and displays in the game panel.

Reel Spin Acceleration - Anticipation of winning is heightened with reel spin acceleration that starts when 2 scatters appear on the reels or when the bonus symbol appears on the 3rd and 4th reels.

Soul Reaper Bonus Game Feature

Devil's Delight features an off-the-reels bonus game called Soul Reaper. The aim of the game is to claim as many souls as possible by correctly matching sins to their corresponding characters. Each correct match wins a bonus coin amount and the soul is added to the SOUL-O-METER.

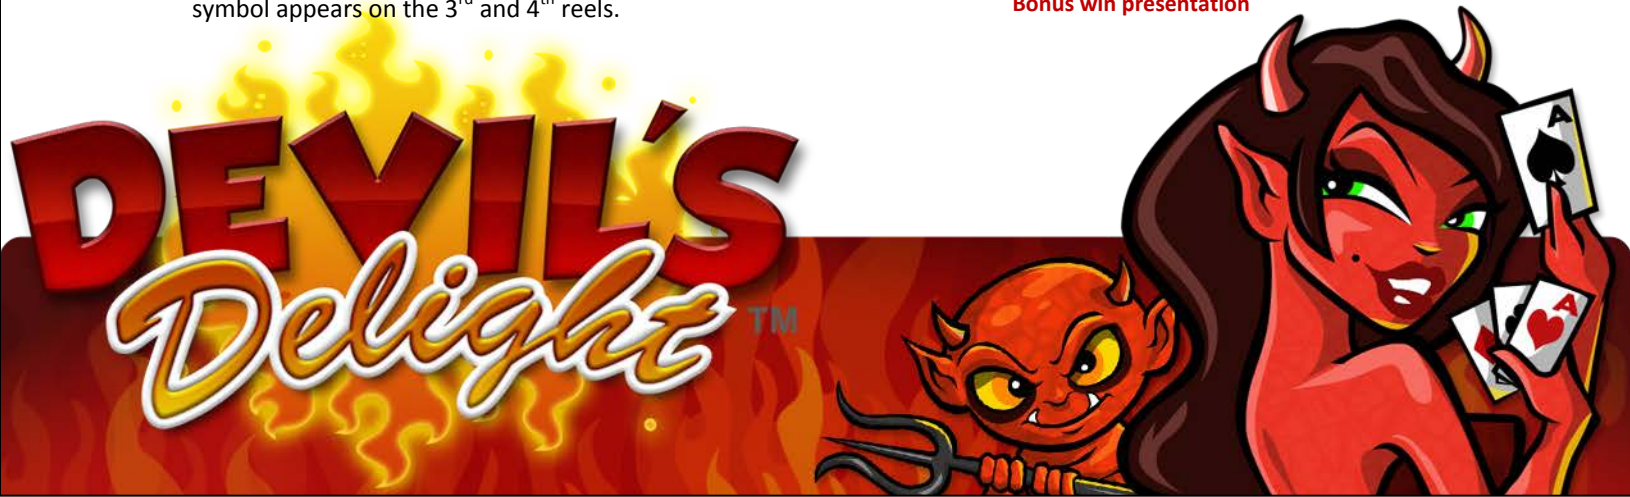

Soul Reaper Bonus Feature

When the player has filled up the SOUL-O-METER, (15 souls total) a special Free spin feature called Sin Spins is activated. The SOUL-O-METER total is saved for 48 hours.

In the bonus game, the player is presented with 5 of the 7 deadly sins and a cast of characters. The player must drag the sin to the character. If correct, a random coin win is awarded for a correct match. The souls collected in the bonus round are added to the SOUL-O-METER.

Sin Spin Feature – In keeping with the sin theme of the Soul Reaper bonus game, Sin Spins feature the same symbols for the 7 deadly sins, plus the Wild symbol from the main game. Players are given 10 free spins played at the same coin value as the main game with all bet lines in play.

Maximum payout – The maximum payout possible win in the Sin Spin round is 50,000 or €25,000.

Scatter Wins and Free Spins

Devil’s Delight features scatter wins and clickable scatter symbols that reveal the number of free spins and win multipliers.

Free spins feature - The game pays out on 3 or more scatters symbols. These wins pay the multiplier displayed in the payable:

- 5=x200
- 4=x50
- 3=x10

Multiplied by the total bet.

Free spin feature – The Free spins feature is activated when players get 3 or more Gate to Hell scatter symbols. The text “Select a Pentagram” prompts the player to click on any one. When the player clicks on the symbol the gate opens to reveal the number of free spins and free spins win multiplier.

Free spins mode – Players click the ‘Start Free Spins’ button to enter the free spin mode. Free spins are played with the same bet level and number of lines as the game that activated the free spins. A dynamic sign informs the players how many free spins they have remaining and the current multiplier applied to free spin wins. This is updated each time the free spins feature is retrIGGERED and new free spins or multiplier are won.

Free Spin wins - All wins pay the win multiplied by the win multiplier (1-5) displayed during the game. This excludes bonus game wins and additional free spins. At the end of the free spins, the total winnings are added to the player’s cash.

Re-triggered Free Spins – When 2 or more scatters appear during a free spins round, this activates additional Free Spins or multiplier. Players must click on the pentagram to reveal the number of additional free spins or multiplier. Additional free spins or multipliers are added to the current tally (up to a maximum of 5x multiplier).

Wild Substitutions

The Devil Wild symbol substitutes for any regular symbol to complete the betline win except scatters and bonus.

Note: Only the highest winning combination on a bet line wins.

Expanding Wild Symbol - The Wild symbol animates on reel 2, 3 or 4 to cover the whole reel when on a winning bet line/s.

Payout

Main slot winnings are paid out depending on the symbols displayed on a bet line when the reels come to a stop. For a combination of regular symbols to be a winning combination, at least one of the symbols must be displayed on the first slot reel, and the remaining symbols must be next to each other on the enabled bet line. The in-slot payable displays the payout for each winning combination.

In-Slot Paytable – Simply click the PAYTABLE to display the payout rules for symbols and general payout rules of the game.
