With the wins tripled in free spins you can win up to 120,000 coins in one spin!

### Main Game Details

Before spinning the reels, players must select the coin value, number of bet lines, and bet level.

The Excalibur game is composed of three main areas - video display, keypad and game panel.

The **Video Display** or main game reel and Free spin reels are visible in the upper area and make up the majority of the screen. The **PAYTABLE** button and information for the maximum possible coin win are shown in this area.

The **Keypad** shows the current bet level (or the number of coins that the player bets per bet line). In addition, it also contains the current number of bet lines, the player's available coins and the recent coin value.

### Game Actions

The buttons on the key pad perform the different game actions:

<b>BET LINES</b>	When the button is clicked the bet line counter increases by one and an additional bet line is highlighted. Players can also click a betline number to select the corresponding betlines.
<b>BET LEVEL</b>	This increased the bet level by one.
<b>COIN VALUE</b>	This increases the coin value.
<b>MAX BET</b>	When this button is selected, the bet level counter changes to 4, all bet lines are active and the game round starts.
	Starts a game round.

### Game Rounds

Each game round starts when the player clicks the SPIN button. Consequently, the bet amount is debited from the current available coins and credit. The reels automatically come to rest.

When the G4 mode is disabled, the player can stop the reels by clicking the spin button a second time.

The **Game Panel**, situated at the very bottom of the screen houses the buttons for game settings such as audio, auto play menus and game rules. It also houses account information and switches between showing the play mode (whether Play or Fun modes), available cash, bet and amount won.

### Game Results

Players have the opportunity to win on any of the bet lines on which they bet. Once the reels stop, the game highlights which lines are winners and how much the player wins on each line. The player's total winnings are summed together and shown in the **WIN** box. The amount won is displayed in the game panel and added to the player's cash.

Winning combinations of symbols are displayed in the Paytable available at the bottom left corner of the game screen.

### Wild Substitutions

Wild symbol substitutes for all symbols except scatters. Wins with regular Wild symbols pay win times 2 when substituting other regular symbols.
