

Golden Derby Game Information

Golden Derby is an exciting and realistic 3D horse racing game from Net Entertainment™. Players can make multiple WINS, PLACE, SHOW, EXACTA and QUINELLA bets at published odds on the outcome of each race.

In each race there are 8 horses, each wearing a different colour and carrying different jockeys. The chance of a horse winning a race is influenced by its form in previous races. Each horse's published odds represent a true reflection of that horse's chances in of winning.

Golden Derby's sophisticated 3D graphics, animation and realistic sound make for an exciting spectacle to watch. The game features Photo Finish images at the end of each race to show 1st, 2nd and 3rd as they cross the finish line. Players are also able to see a summary of their recent bets and results of previous races.

Game Design

Each Golden Derby race features a truly remarkable 3D horseracing movie designed to match the real thing! The detailed racetrack setting includes buildings, spectators, trees and background scenery right down to the dust flying off the horse's hooves!

Each race is shown from multiple camera angles, including close-ups, panning shots and birds-eye view. Background sound and sound effects add to the feeling of authenticity.

At the end, the final dramatic photo finish makes it easy for the player to see which horse made the 1st, 2nd and 3rd place.

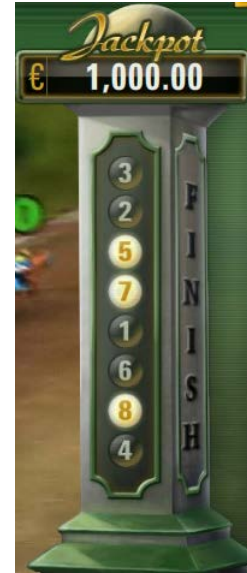

Each movie is supported by dynamic information displays showing the current positions, the current winning bets, the total potential win right now and the matched Jackpot numbers – all updated in real-time!

Jackpot

Golden Derby features a progressive Jackpot.

The Jackpot numbers (1 to 8) are assigned when the race starts and displayed from the top down in the player's Jackpot list. Each number in the Jackpot list represents the number of one of the 8 horses in the race. If a horse is in the correct position, the Jackpot numbers light up.

The chance of winning a full or part Jackpot is dependent on the total amount bet on the race by the player.

	Pays if...	Payout
Full Jackpot	All 8 horses finish in the positions shown in the Jackpot list	100% of the current Jackpot
Part Jackpot	6 horses finish in the positions shown in the Jackpot list	10% of the current Jackpot

The Jackpot is reseeded after a Full Jackpot payout so guarantees that there is always a sizeable amount to be won.

Betting

There are 5 basic Bet Types that a player can place in a Golden Derby race.

Players can place multiple bets on different types on the same race as long as it is within the maximum bet limit. For example, a player can bet on two horses to win the race and another two to complete an Exacta.

The BET tab and its sub-tabs (WIN, PLACE, SHOW, EXACTA And QUINELLA) give the player easy access to all betting functions of Golden Derby.

Continuation on Betting...

Golden Derby also has one-click selection buttons, clear labels and colours, field highlighting and other dynamic graphics to make it easier for players to make their bets. Players can type amounts directly into bet fields or use the quick entry denomination buttons to place bets in standard increments.

The exact odds for each bet type are shown directly on the betting screens.

The possible win for each bet is calculated and displayed as soon as the player enters an amount.

Tool tips appear over buttons and other important elements to help guide new players.

Standard horseracing terminology is used through the interface to help introduce terms to beginners and allow regular punters to play.

Bet Slip

The Bet Slip tab provides players a complete overview of all the bets placed so far on the upcoming race.

On the bet slip, each bet is clearly shown, along with the amount of the bet, the odds and possible win.

Players can remove individual bets or clear all current bets from the bet slip with a click of a button.

Individual bets are kept separate on the bet slip. For example, multiple different bets can be placed on the same horse to win.

Players can leave the bet slip, place more bets, and then return to it at any time. This allows the player ample time to manage their betting systems and patterns.

Race Form

In Golden Derby, the previous form of each horse influences its likelihood of winning the coming race. Players can see the form of each horse in the race by clicking the RACE FORM tab. The same information can also be accessed with the information buttons that are displayed next to the horse's name. Various statistics and graphs are presented to the player on the RACE FORM tab to help him or her understand the winning potential of each horse.

These information includes:

- Speed
- Stamina
- Strength
- Last 5 race results
- Current WIN odds
