Reel Steal Video Slot Design

The Reel Steal slot is comprised of three main elements— video display area, keypad and game panel. The game is optimized for screens 640x480 and 1024x768.

Video display area - The main game, free spins and bonus games are played in this area. In addition, the payable is also displayed in this area.

Keypad - The keypad houses the current bet level (number of coins per bet line), the current number of bet lines, available cash in coins and the current coin value. In addition, the main game buttons used to select the bet level, bet lines, coin value, view the bonus game preview and start the game are located in this area.

Game panel - In this area the game displays the available cash in the player's account, as well as the amount bet and won. Buttons for the game settings menu, audio, game rules and Autoplay are located to the left on the game panel history.

Game rounds - A Reel Steal game round starts when the player clicks the spin button; the amount bet is deducted from the current credit (available coins and credit). The reels spin and automatically come to rest. The player has an option to stop the reels by clicking the spin button (available when G4 mode is disabled).

Game results - Players can win on any one of the bet lines on which they bet. The game highlights which lines are winners and how much has been won on each line. The total winnings are added together and shown in the Win box. The amount won is added to the cash and displays in the game panel.

Scatter Wins and Free Spins

Scatter wins – The main game pays out on 2 or more scatters. These wins pay the multiplier displayed in the payable plus the total bet.

Reel Spin Acceleration - Anticipation of winning is heightened with reel spin acceleration that starts when 2 scatters appear and there is still one or more reels left to spin.

Free Spins Feature – When 3 or more scatter symbols appear in any position, the player wins 15 or more free spins. The free spins are played at the same bet level and bet lines as the game that activated the free spins feature. A dynamic sign at the bottom informs players of how many free spins they have and the current multiplier applied to the free spin wins.

Retriggered Free Spins – During free spins, players can also win additional free spins when any scatter symbol appears.

Free Spin Wins – Wins during free spins pay 5 times the normal win. At the end of the free spins feature, winnings are added to the player’s cash.

Wild Substitutions

The Reel Steal game includes wild symbols that substitute for any other symbols except for scatters in order to complete a winning bet line/s.

Wild wins in the main game – Wins with wild symbols pay 5 times the normal win.
