The **Keypad** shows the current bet level (or the number of coins that the player bets per bet line). In addition, it also contains the current number of bet lines, the player's available coins and the recent coin value.

The **Game Panel**, situated at the very bottom of the screen houses the buttons for game settings such as audio, auto play menus and game rules. It also houses account information and switches between showing the play mode (whether Play or Fun modes), available cash, bet and amount won.
